## PITHY PARAGRAPHS.

"They have a queer way of doing things at the postoffice in Kansas. The State's coal output was set at the lowest figure, and the most contract has just been let to the highest bidder."

"One thousand miners went out on the 16th at Morris Coal Co., in the Kentucky Valley. President C. Morris, of the Morris Coal Co., said in relation to the strike that one man had been discharged for sending out inferior coal because he had not been taken back the miners had struck."

"Despite the new law about the care in handling dynamite and the rule to be followed, which are posted at every mine in Pennsylvania, accidents from this dangerous explosive are numerous. In a tunnel in No. 5 Jello shop, which is penetrating a fault, a negro carrying a box of 25 pounds to a pile on which were three other boxes was blown to atoms, no place larger than a man's hand being found of his remains. Seven men were blown out, and the gateway blocked. It is thought that he let the box of dynamite fall."

"Mr. E. W. Parker, who had charge of the coal exhibit at Atlanta, Ga., has distributed the various samples to charitable institutions in that city. Mr. Parker knew that the companies would not dare to have the coal returned, and thought that (his) would be the best method of disposal. He accompanied with the different exhibitors and secured their permission to allow the supply to be distributed in the way named."

"Six dollars per ton is considered a very low price for coal from Baltimore around the Horn to San Francisco, but it is easy to be seen that if this trade were restricted to American vessels, it would be quickly cut down by the competition of Britishers, who sell their coals at a price as cheaply that it is a wonder how they manage to exist. The rate on coal from Detroit (Channel ports to San Francisco) is the price of 100 tons at no time exceeded 15 shillings, or a little less than \$4.00, while cargoes have been taken at 18 shillings, or less than \$3.00."

## HAWAII, 'THE PEARL OF THE PACIFIC.'

The Third of a Series of Letters by John R. Musick.

Author of the Columbian Historical Novels, "Hawaii Against the World," etc.

(Copyright, 1896, by John R. Musick, New York)

Sans Souci and the Government Buildings, with Reminiscences of Jules Verne and Robert Louis Stevenson.

The most celebrated hotel and bathing place in the islands is Sans Souci, which is near the famous Diamond Head. Sans Souci has had for its guests one of the most famous literary men of the age. Mark Twain spent a good deal of his time while on the islands at this place. Jules Verne and Robert Louis Stevenson made it their home. The latter, in writing of this hotel, said:

"If I say one desires such a (fashioned) house as lovely scenery, quiet, pure air, clear sea water, good food, and heavily sunning along out before his eyes every evening over the Pacific and the distant hills of Waiman, I need not mind him cordially to the South."

I found several gentlemen at Sans Souci who had written recollections of Stevenson. He is described by all as a small man weighing, perhaps, less than one hundred pounds, and an inveterate cigarette smoker. It is barely possible that nicotine poison has not done him any harm, strange, mysterious, gifted man.

"He smoked from morning until night," said the manager of the hotel. "I am certain he would consume sixty cigarettes a day. He was very pleasant, unless irritated, and then he was like a man. He was a man who disturbed him while writing or meditating were sure to hear from him."

Mr. Timmons, city editor of the Hawaiian Star, said:

"He was out," answered the small man, and he went on with his writing.

"Well, perhaps you can answer my question: I came to see Mr. Stevenson."

"The small man dropped his pen, arose, and extending his hand, said: 'I am Mr. Stevenson.'"

"This was my introduction to this remarkable man."

Then Mr. Timmons told me how Mr. Stevenson came to write his famous novel, "Dr. Jekyll and Mr. Hyde."

"The novel was written on this island and in this town. The Dr. Jekyll and Mr. Hyde live in Honolulu, and you will perhaps meet him before you go. That novel was the offspring of a bitter religious war between Rev. Father Dannon and Rev. Dr. Hyde. Dr. D., who has charge of the mission school in this city for the training of the natives, and the controversy between the priest and Dr. Hyde was a religious war. Dr. Hyde, a sharp, and cutting, answered him from the pulpit and through the press. The contest became personally bitter."

"Mr. Stevenson had up to the time of this controversy, it seems, been a doctor of the very perfection of a gentleman, a scholar and a Christian; at which he seemed a very dapper, and an inveterate cigarette smoker. It is barely possible that nicotine poison has not done him any harm, strange, mysterious, gifted man."

## SOMETHING WORTH KNOWING.

At Oakland, Cal., there was a shortage of coal on a recent date and when a vesselload arrived there were 75 cars in line waiting a chance to get a portion thereof.

The Davis Coal & Coke Co., of West Virginia, recently made a shipment from Baltimore to Genoa, Italy, of 977 tons of coal and 40 tons of coke. This shipment of coal was made at a freight rate of \$1.25 per ton from Baltimore wharves.

One dealer advertises: "Cherries, row beds and pearls are all right in their season, but with the weather you need diamonds—black diamonds: we have them direct from the 'Lahish' district."

One surprising result of the miners' convention at Pittsburgh was the overthrow of John Calmes, their conservative president, who had much to do in bringing about the high uniform rates paid the miners. In his stead was chosen Pat Dolan, an impulsive fellow, who was not long ago accused of leading a riotous party on a mine. The vote was 34 to 25.

Coke production and output are being curtailed to meet the requirements of demand. By the end of this week there will be 1,000,000 tons in blast and production will be 10,000 tons a day. What it was for two months prior to January 1st, when the new rates in coke took effect. This time in the market was not unexpected. The operators looked for it. They predicted it and it came. It was a slump, and their expectations have been fulfilled. But the general effect will be beneficial to the trade.—Columbian, Chicago.

An official of one of the Austroriparian companies said: "What the coal trade mostly needs now, and what is needed for some time, is a good brain, somewhere in connection with it. I don't see why the stockholders in our companies don't get up and fire everyone of us on our own records. I suppose there will always be people in the coal business and in the railroad generally who will be willing to give 5 per cent in tonnage and lose 25 per cent in revenue. It is about time to begin to consider dollars in the coal trade instead of mere tonnage."

## CURING CORNS.

What the Pedicure Says of Those Painful Excesses.

CAUSED BY ACID IN BLOOD.

Ice-Cold Water, a Cure for Dry and Hot Feet for Mole Feet—Change the Blood Often.

(From Women's Page of the Philadelphia Press.)

A man who has made the human foot an object of research and study declares that stock stockings are nearly as injurious as short shoes. Those of insufficient length press the knuckles of the foot upward and when the shoe forces them down the natural result is a painful excrescence that vulgar folks designate as a corn.

"But surely you don't consider an ill-fitting stocking the cause of bunions, do you?" I inquired.

"One of them," he replied.

"Corns are the result of pressure. You see, the blood is forced from the sebaceous glands, therefore an excessive or unnatural quantity of oil is thrown off. This dissolves the blood, and the oil forces its way to the surface of the toe. As it reaches the cuticle it evaporates, leaving the top layer hard. Layer upon layer of oil forms downward and deepens until it presses on the nerves."

THE RESULT OF ACID IN BLOOD.

"Corns have no roots. That idea is fallacious. But they cannot be cured until an instrument goes down layer of oil forms downward and deepens until it presses on the nerves."

"After a corn has been removed, find out literally where the shoe pinches, then bathe the feet in cold water every morning upon arising, and rub the part with dry flannel. This will keep the corn from coming back. If you do not, the corn will grow again, and the water will be as hot as the skin can stand it, and bathe just before retiring. If the feet swell after being washed, put a little vinegar in hot water; if they ache, use a few drops of ammonia or borax."

Rest the feet often. To do this change the boots as frequently as possible. Even from an old to a new shoe is a rest. The muscles of the foot tire of one position, and matter how easy the leather or last may be. Four or five times a day, if convenient, is none too often to take this trouble, and the benefits are astonishing.
